Custom Printed Transfers

Presto Easy Trans

We have taken our Presto Super Tuff (PST) and improved this product significantly. The result is PRESTO EASY TRANS.

This screen printed transfers application is virtually fool proof. It is applied with a hot peel with varying times and temperature. It can be applied to any colour with no garment bleed.

Softand

This is a hot split transfer. When applied this transfer splits into the garment providing a sharp image and a softand feel that is difficult to duplicate with other screen printing methods. Softand transfers are ideal for t-shirts, sweatshirts and many other applications.

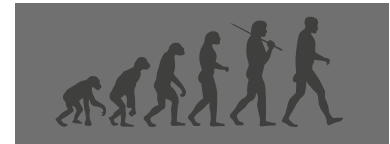

Digi Edge Plus

This transfer combines the best of digital and screen printing processes. It provides a vibrant full colour opacity with out the need for a common background colour. With this transfer we can print the most difficult artwork with a wide variety of garment types.

Presto Clear Trans

This is the transfer to use to achieve a tone on tone effect on various colours of garments. We use a special clear ink with an adhesive to bring out the garment colour for a tone on tone effect.

Digi-Max Transfer

These transfers are digitally printed on a substrate with a clear mylar background for easy application. They will not crack or peel and are ideal for tough to print garments and stretch apparel. Brilliant colour and opacity on any colour background make these transfers perfect for complex multi-colour logos and small designs. Digi-Max transfer will apply to just about any type of material.

Presto Dye Trans

These transfers can be applied to apparel with polyester content of 100% and polyester/cotton content of 65/35. The best results for unlimited colour and high resolution detail are achieved on white 100% polyester, while tone on tone effects and interesting colour combinations can be achieved on light colour garments.

Glitter Transfers

These are screen printed plastisol transfers with glitter flecks in the ink. They are available in gold or silver. They can be combined with Presto Easy Trans transfers for multi-colour logos.

Sublimated Polyester

Full vibrant colours with no limit on colours or graphics.
 Our permanent adhesive eliminates sewing to garment.
 Custom cut to any shape.
 Crest is soft and pliable when installed on jerseys.
 The perfect choice for team and corporate apparel.
 See page 21 for application instructions.

Subli Twill Crests

We match the best in sublimated transfers with the best twill substrate which results in a high quality sublimated crest. These crests will withstand the industrial washing that uniforms require. They are ideal for multi-colour or process colour designs which would otherwise have costly artwork. The twill has a light adhesive for tacking purposes only.

Price your design:

Measure the area of each design layer.
 Example: 30 pieces / 2 colour design
 Layer one : 5" x 9" = 45 sq. in. = \$3.80
 Layer two : 6" x 10" = 60 sq. in. = \$4.70
 Design cost: \$3.80 + \$4.70 = \$8.50

Sewing:

Sew Disks are available starting at \$25.
 All of our 2 colour Pro-Twill logos are shipped KISS-CUT.

The following guidelines are provided to help reduce added art charges.

Supplied artwork: The best way to supply your artwork is as a vector file at the exact size you want it finished. This is easy but if you can't edit your piece tell us the finished size you want it.

Please email all vector artwork as a .ai, .eps or . PDF file with a .jpg proof for accuracy to orders@prestocrest.com. When emailing artwork, your file should be no larger than 10mb.

We prefer to work with vector art saved or exported as a Adobe Illustrator .ai, or a Encapsulated Postscript .eps. file. If you are working in Corel Draw please save or export your files as above before emailing them to us.

To avoid added art charges your artwork file should meet the following criteria:

Coloured artwork should be supplied as a vectored file. Raster file types such as .jpg, .gif, etc. must generally be recreated from scratch by our art department .

All colours in your artwork should be Pantone SPOT COLOUR, not 4 COLOUR PROCESS (CMYK).

Each colour in the design should only be assigned one distinct Pantone colour. Also, if your design includes white please make sure that it has been coloured Pantone white.

Please convert all fonts/text to outlines (ai) or curves (cdr). Fonts / Typefaces can change when opened on a different computer .

If your file includes 'placed' images please make sure you include them separately or embed them into the file if your program allows it.

All line weights in the design must have a thickness of 1.25 points or higher to screen print.

For Multi Colour Presto Easy Transfers (PET) the artwork needs to have a common background colour surrounding all printed colours unless the design elements to be printed do not touch or partially overlap. If this is not the case a clear background will be added to the design and be charged as another colour.

Any variation from these recommendations may result in additional art charges as we have to spend time making the artwork compatible with the screen printing process.

Creative Service Charges

Your art charge depends on the time spent by our art department to bring your artwork to a reproducible level. The time spent depends on the detail and quality of the copy supplied. Art time is charged at \$50.00 per hour or \$15.00 per 1/4 hour.
